

C8 TICKETS

GATE STAFF PLAYBOOK

Print this once per event. Keep one copy at the gate. Every staff member should read the "Quick Start" and "Signals" sections before doors open.

QUICK START (READ THIS FIRST)

1. Log in with the gate account

Only need to do this once per phone. Do NOT log out at end of shift.

2. Pick your event from the dropdown

Or leave on "All Today's Events" — the app blocks tickets from other days automatically.

3. Tap "SCAN" then "Start Scanning"

Grant camera permission the first time.

4. Hold the customer's QR code steady, 6–10 inches from the camera

Screen will react instantly when a code is detected.

5. Read the fullscreen result — green = go, red = STOP

Tap anywhere to dismiss and scan the next person.

SIGNAL COLORS

 **GREEN — Checked In** — Let them through. Move to next person.

 **ORANGE — Already Checked In** — Someone in the party already scanned this. Ask their name to verify. Do NOT let a duplicate in.

 **RED — Wrong Event** — Ticket belongs to a different event or day. Politely explain and redirect.

 **RED — Entry Denied** — Order was cancelled or refunded. Do NOT let them in. Refer to the promoter.

 **RED — Ticket Not Found** — QR isn't recognized. Ask the customer to open their confirmation email. If still no luck, use Manual tab.

MANUAL SEARCH (WHEN QR WON'T SCAN)

- Damaged QR, faded printout, or phone battery dead
- Customer forgot they need to show a QR
- Scanner is being finicky in low light

How to use it:

- 1. Tap "MANUAL" tab at the top**
- 2. Type first name or first few letters of email**
- 3. Tap the matching customer to expand their tickets**
- 4. Tap the individual "Check In" button, or "Check In All Remaining" for the whole group**

DO / DO NOT

DO:

- Keep the app open on the Scan tab during your shift
- Trust the app — green means go, red means stop
- Use Manual search if a scan won't fire on the second try
- Check with a supervisor before overriding anything

DO NOT:

- Log out at end of shift — the next staff member needs the session
- Force-quit the app during a rush — you'll lose 5–10 seconds relaunching
- Let anyone in on a RED screen without a manager's call
- Try to fix technical issues yourself during peak — flag a supervisor and use Manual

TROUBLESHOOTING

Scanner shows the green box but never reads the QR

Damaged or old ticket. Ask customer to zoom in on their phone screen. Or use Manual search.

Camera won't open

Check Settings, then C8 Tickets Staff, then make sure Camera is enabled. If just installed, first launch always asks; tap Allow.

App says "Wrong Event" but you're sure it's the right one

Check the event dropdown at the top. If wrong, switch it. If correct, the ticket may be for a different day.

Everything is slow / scans take 5+ seconds

Venue WiFi is likely weak. Ask a supervisor to switch to a hotspot. Manual search still works.

App crashed or hung

Swipe up from the bottom, close the app, reopen. Log in should be remembered.
